

T. J. SNOW CO.

SB-1 BENCH WELDER

T. J. Snow introduces the low profile bench type spot welder with a compact and sturdy, machined 'C' type frame. The robust frame is designed to minimize deflection and facilitate easy integration with AC or DC inverter transformers and weld controls.

STANDARD FEATURES

- Low inertia ram
- Choice of welder control
- Shrouded foot switch initiation
- Fixture type transformer
- Water cooled holder and electrodes sized to application specifications
- Non-lubricated air system

OPTIONS

- Mounted on a sturdy steel table with adjustable height legs and solid maple butcher block work surface with all components mounted & integrated
- Dual palm initiation
- MFDC or AC inverter
- Re-circulating water chiller
- Locator tooling available by request

Specifications

Throat depth		8"
Horn gap		5"
Voltage		230 or 460
Hertz		50 or 60
Electrode gap		1"
Cylinder Diameter		3-1/4"
Operating stroke		1-1/4"
Max Weld Force		660 lbs @ 80psi
Dimensions	Length	14.25"
	Width	10"
	Height	29.75"
	Weight	210 lbs
