Controls for Resistance Welding

EN1701

Mid Frequency Inverter Constant Current Controls

Features

- Millisecond control of weld time
- Spot, Pulsation or Seam Sequence
- RS232 Port
- Programmable options: Slope, Preheat, Quench, Temper, Postheat
- Linked Programs
- External Schedule Select
- Event & Error Outputs
- 64 Programs
- Repeat / Non-Repeat
- Earth Leakage Detection with Shunt Trip Breaker
- Isolation Contactor Timer
- Single/Dual Gun
- Programming in phase angle, kA or %
- Measurement Log
- 24 VDC flexible I/O (19 in 16 out); some mapable between weld functions, events and simple I/O sequences
- Dual Gun Stepper with Presets and Tip Dress Counter
- Diverse schedule capabilities provide maximum application versatility
- I/O Sequencer
- 4-20 mA or 0-10 V analog inputs and outputs provided for pressure sensing and control
- Two 0-10V analog inputs (Sequencer)
- Program Select
- Retraction
- Dual-interval Welding Sequence

Constant Current

- Control adjusts current output every millisecond.
- No setup necessary for constant current operation.
- Compensation is still available without secondary coil.
- When optional secondary coil is used, secondary amps are directly displayed.
- Primary current sensors built in.
- High, Low and Pre limits.
- Manual calibration via 2 set points for secondary coil.
- Pop-up current meter to assist programming.
- Maximum primary Amp limit.
- Auto secondary coil test.
- Control uses a dual loop feedback system to optimize its performance in terms of both speed and accuracy.
- Results of last weld available immediately.

Options

- Detachable 4 x 20 LCD Program Pendant (RPP1) with data backup
- ENLINK 1701
- Ethernet port
- Secondary coils
- Program Lockout
- Operation Mode Switch (OMS) – Program Lockout & Weld/No Weld
- Pressure Sensors
- Proportional Valve
- Isolation Contactor
- GFI for portable guns
- Water Flow Switch
**Expanded Capabilities**  
(Requires additional software and/or hardware)

**TO PROGRAM, YOU WILL NEED:**  
Program Pendant (RPP1)  
Detachable, hand-held pendant accesses all programmable variables and displays current and status.

**– OR –**  
**ENLINK 1701**  
Communication software provides PC interface for remote programming and monitoring of control.

**TO MEASURE CURRENT IN AMPS, YOU WILL NEED:**  
Secondary Rogowski Coils  
Available in 3", 6" or 12" diameters. Provides actual secondary amperage measurements.

**– OR –**  
Coil as part of Weld Transformer.

**OPTIONAL:**  
- **Ethernet Card**  
  Provides ability to network multiple controls using ENLINK 1701.
- **Pressure Sense and Control Hardware**  
  Using provided analog I/O, add differential sensors, single-ended sensors, or ⅝” and ⅞” port proportional controllers.
- **GFI for portable guns**
